# Biswajit Pradhan

Bhubaneswar, Odisha | 8895980998 | basantbiswa04@gmail.com | biswajitpradhan.in

## Technical Skills

- Languages: **Python** (Advanced), **SQL**, **JavaScript**, **Java**.
- ML Libraries**: Pandas, NumPy, Scikit-learn, TensorFlow or PyTorch, Matplotlib, Seaborn**.
- Tools/DevOps: **Git/GitHub**, **Docker**, Google Colab, Jupyter Notebooks, **AWS** (Sagemaker basics).
- Core Concepts: Supervised/Unsupervised Learning, Neural Networks, Feature Engineering, Model Evaluation (**RMSE, F1-Score, AUC-ROC**).

## Experience

**Infosys Springboard** | Backend Development Intern (Django) | Aug,2025 - Oct,2025

- Project: Job Portal
- Architected a robust backend using **Django and REST Framework** (DRF)
- Designed and optimized SQL database schemas (PostgreSQL/MySQL), ensuring efficient data retrieval and integrity—a core skill for managing ML training data.
- Integrated Authentication on and Authorization on protocols, securing sensitive user data and improving system reliability.
- ML Relevance: Developed **API endpoints** to bridge the gap between frontend interfaces and backend logic, gaining experience essential for Model Deployment and serving ML predictions via **REST APIs**.

## Machine Learning Projects

**Sentiment Analysis using NLP**

- Developed a sentiment classification on model using **Python and NLTK to analyse** 1,000+ movie reviews.
- Implemented **TF-IDF Vectorization** on and compared **Multinomial Naive Bayes** vs. **Random Forest**, achieving 89% accuracy.
- Cleaned and pre-processed raw text data (stop-word removal, lemmatization).

**House Price Prediction**

- Engineered a regression model to predict real estate prices using a dataset of 5,000+ entries.
- Handled missing data and outliers; performed **One-Hot Encoding** on categorical variables.
- Optimized hyperparameters using **GridSearchCV**, reducing Mean Absolute Error by 15%.

## Achievements / Certifications

- **Deeplearning.ai**: (e.g., DeepLearning.AI TensorFlow Developer or Coursera Machine Learning Specialization). \
- **HackerRank** Gold batch for Python Programming.

## Education

**Government College of Engineering, Keonjhar** | Bachelor of Technology in Computer Science & Engineering

- Expected Graduation: May 2027 (Current CGPA: 8.0/10.0)
- Relevant Coursework: Data Structures & Algorithms, Linear Algebra, Probability & Sta s cs, Discrete Math, Database Management Systems.

**Jawahar Navodaya Vidyalaya, Jharsuguda** | 12th - CBSE

- Year of Comple on: 2022
- Percentage: 90.8%
- Subjects: Physics, Chemistry, Mathematics ,Biology, English, Library & Information Science
